

THE POWER OF BEING UNDERSTOOD

RSM CLOUD PORTFOLIO

Customizable cloud solutions to increase your capacity, flexibility and productivity

Is your organization leveraging the power of the cloud? Let RSM design a reliable, secure solution from our suite of cloud services.

The business landscape is constantly changing, and as your business grows, so do your technology and regulatory challenges. To maintain compliance, control costs and meet shifting workload demands, organizations are navigating to more reliable, secure ways of managing data.

To meet these demands, many organizations are turning to the cloud to house some or all of their technology infrastructure. The right cloud deployment provides the resources companies need to manage operations without the worries associated with buying and maintaining equipment and facilities. This strategy can help your organization stay ahead of the competition by improving performance and reliability without sacrificing security.

A comprehensive, flexible cloud solution

Some organizations debate whether the cloud is right for their needs or which cloud solution is the best fit. No matter what your unique needs are, or where you are on your journey to the cloud, RSM's Cloud Portfolio can help. We offer a full spectrum of solutions and services to help you choose a path that aligns with your business and your comfort level.

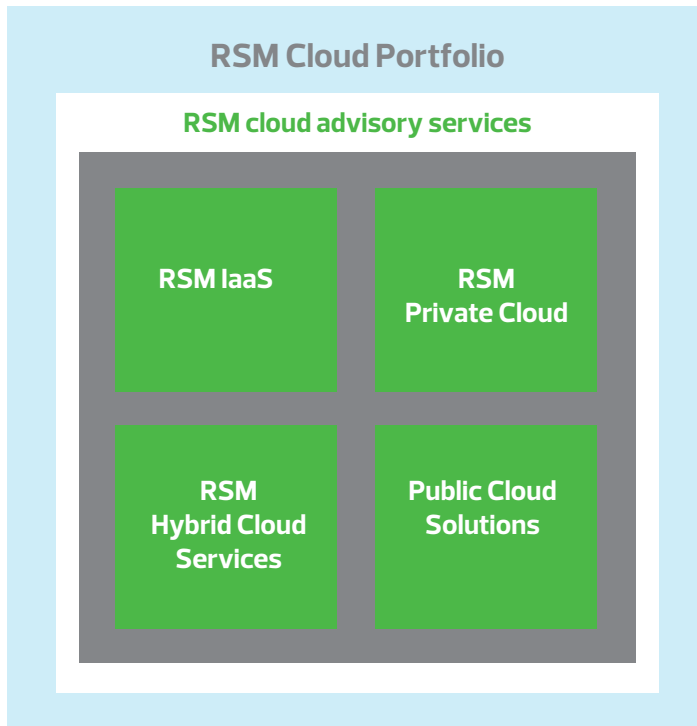

The RSM Cloud Portfolio is comprised of several offerings to help your business become more agile and efficient and ensure you get the most from your technology investments. You have the flexibility to combine any or all of our cloud services, and we work with you to design a road map to fit your needs. Our services include:

RSM IaaS – RSM IaaS is a secure, reliable Infrastructure as a Service (IaaS) platform that improves computing, storage and networking capacity. The solution is flexible and scalable with service that's delivered when and how you need it. RSM IaaS's subscription model provides a consistent monthly expense for your environment and the computing and networking resources you need.

Public Cloud Solutions – We help you select and configure vendor-managed cloud applications and environments, such as NetSuite, Microsoft Azure, Microsoft Dynamics® and Microsoft Office 365. The public cloud is an affordable, flexible solution to transition your data to a virtualized environment.

RSM Private Cloud – If your organization has enhanced compliance demands, our private cloud solutions are designed for optimal security and privacy. This platform provides an ongoing subscription model to host and manage your business applications with increased control, reliability and efficiency to meet or exceed regulatory standards.

RSM Hybrid Cloud Services – Many organizations are best served by utilizing hybrid scenarios which are a combination of these cloud solutions potentially in tandem with on-premise technologies. Two common offerings associated with RSM's Hybrid Cloud Solutions are the single sign-on user authentication process and integration, bridging the network divide between your existing applications and systems, and hosted, mobile and big data platforms.

Ongoing guidance and support

RSM will provide you with continuous on-site guidance and design services throughout your entire journey to the cloud. We'll be alongside you every step of the way, even after your implementation, to help adapt your platform as needed. We deliver support the way you want it, whether it's online, via email or with 24/7 live support.

The RSM difference

Our Advise, Deliver and Maintain approach helps to choose the most effective cloud solution for your business, meeting your current needs and evolving as your technology demands increase. In addition, our Cloud Computing *Rapid Assessment*[®] is a proven tool to help quickly identify which cloud solution can provide the most meaningful impact to your productivity.

Experience the power of being understood

The RSM Cloud Portfolio is built upon best practices developed over 30 years of consulting, delivering and monitoring technology. We understand your concerns and your challenges, and offer flexible cloud solutions to fit your unique needs. The RSM Cloud Portfolio presents you with several options, allowing you to choose only the services that make sense for your organization.

Unlike some providers, our national reach and local resources mean that we meet personally with you, evaluate your goals and design a platform to optimize performance while minimizing risk. We understand where you are and how to help you get where you want to be—in a new comfort zone with enhanced technology resources.
