DATA-DRIVEN REVENUE CYCLE

Optimized analytics for a Cerner patient accounting (CPA)/practice management (CPM) environment

High-performing revenue cycle teams have one thing in common. They employ laser-sharp analytics to develop world-class workflows that drive results. This analytical approach to transforming an organization requires a reporting platform strategically aligned to produce actionable insights. For Cerner revenue cycle environments, RSM has developed a customized best-practice reporting package for acute (CPA) and physician practices (CPM). These reports are designed to drive your key performance indicators (KPIs) to the top of the quartile and ensure optimized alignment with your clinical and financial systems (supply chain, general ledger, finance).

At RSM, our health care advisory services professionals have deep technical and operational skills gained through years of hands-on experience in Cerner solutions. They understand the limitations of out-of-the-box reporting vs. the real-world operational reporting needs in both acute and physician billing settings.

For clients who desire additional reporting detail, RSM consultants deliver customized consulting for report design, development and maintenance tailored to support meaningful and comprehensive revenue cycle management.

**Meeting the needs of your health care consumer**

With consumers driving the need for convenience, transparency and cost efficiency, businesses must adapt and deliver on these preferences to remain connected to their constituencies and ahead of the competition. Health care systems and hospitals must adjust to this consumerism philosophy. From transparent services and billing to instant access to nurses and physicians, patients require care delivered in a customized and seamless way. Likewise, health care systems strive to deliver quality integrated care to their patients. Failure to do so could mean dissatisfied patients and stagnant organizational growth.

What does a successful model that addresses consumerism and incorporates an integrated care strategy in an efficient and profitable way look like? It starts with optimizing your organization’s foundational efforts related to revenue enhancement, cost management, regulations and risk, quality of care and operational efficiency.
