

Bring secure AI to every school and office

Copilot for Microsoft 365 | Secure adoption and workshop

Microsoft Copilot helps district staff and educators reclaim hours spent on communications, lesson planning support and administrative work. RSM enables safe, district-wide adoption with the data protections families and regulators require.

A structured, three-phase framework

INSPIRE

A scoping session and “Art of the Possible” workshop showcase Copilot across Microsoft 365, with day-in-the-life scenarios for up to three groups—e.g., district admin, educators and operations.

ASSESS

A zero trust review of SharePoint, OneDrive and tenant sharing protects student data under FERPA and COPPA. Includes an acceptable-use policy template and a pilot for up to 60 users.

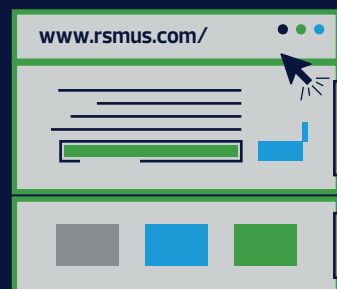

IMPLEMENT

Conditional access and sensitivity labels, up to 5 use-case sessions and up to 16 training sessions across 6 agendas—plus free Copilot Studio and Agent AI workshops.

What your organization gains

- Give teachers and staff time back for students
- Standardize safe AI use across the district
- Support staff with limited IT resources
- Protect student data under FERPA and COPPA
- Reduce administrative and communication load
- Adopt AI with clear, board-ready guardrails

DESIGNED FOR K-12 school districts

Give teachers and administrators time back while protecting student data under FERPA and COPPA.
